

Health Improvement Plan Workshop November 2007 Collated Group Information

Travellers, Black & Ethnic Communities

What has worked well?

Travellers quite well targeted and integrated – big improvement in cross border communication

Interpreting services constantly evolving and improving

What hasn't worked?

All about what has worked well is that we are still about crisis response rather than prevention so we are responding rather than being pro-active

What gaps are there?

Work especially around ethnic and migrant groups isn't well co-ordinated, it is not joined up

Multiple issues such as housing, education and health need for an over arching strategy and action plan

Crisis response still being made rather than pro-active work

Proposed future action?

Focus should be on black, ethnic minorities, migrant workers

Prostitution enforced
